Collaborative Scientific Programming

Appendix: Survey questions

PERSONAL INFORMATION

- **Anonymous nickname** (for use in both pre- and post-course surveys)
- **Program of study**: Bachelor ocean/atmosphere (3 years) | Master ocean/atmosphere (2 years) | Master energy (2 years) | Master energy (integrated, 5 years)
- **Year of study**: First/Second/Third/Fourth/Fifth year
- **Prior experience with programming**: None | INF100 [general 1st-year mandatory introduction course] | More than INF100, self-taught | More than INF100, formal education

LIKERT SCALE

The questions were introduced with the following instructions:

> Please answer the questions using the following scale:
> ★ (1) - Strongly disagree
> ★★ (2) - Disagree
> ★★★ (3) - Neither agree nor disagree
> ★★★★ (4)- Agree
> ★★★★★ (5) - Strongly Agree

PRE-COURSE (10 QUESTIONS)

1. I like programming.
2. Programming is interesting.
3. I would like to continue learning programming in the future.
4. I would like more programming teaching in the next year.
5. I find programming easy.
6. Programming concepts and syntax are easy for me to learn.
7. I am confident that I could learn a new programming skill.
8. Programming makes me feel more like a geophysicist.
9. Collaborating in coding activities makes me feel more like a geophysicist.
10. I believe that programming skills will be beneficial for my future career

POST-COURSE (20 QUESTIONS + OPEN-ENDED FEEDBACK)

> [same pre-course 10 questions, in addition to:]
>
> **Reflections on the course**
> In the following questions, we use the acronym 'GPF' to refer to the 'Git-Python Framework' (correponding to the interplay between GitLab, Visual Studio Code, GitHub Desktop, etc) used to practice collaborative scientific python.

11. When I first started with the GPF, I had troubles figuring out how to use it.
12. I enjoyed using the GPF during coding.
13. I valued learning about the GPF.
14. Using the GPF makes me more eager to keep coding regularly.
15. I am confident in my ability to use the GPF to code.
16. The GPF made it easy to keep track of changes in documents.
17. The GPF made it easy to share all kinds of documents.
18. The GPF made it easy to collaborate on code with my peers.
19. The GPF is great for working on group projects.
20. After some experience with the GPF, it has become much easier to use.

General thoughts and comments about the course.
This short course situates itself somewhere between a pilot and a workshop, and happened out of a voluntary initiative to introduce the students at GFI to something possibly new and certainly useful overall for them.

Whether it is for its improvement, possible future iterations, an online version or a tutorial guide for all users at GFI, I would be very grateful to have your thoughts, comments, suggestions, critiques, or a few words on your experience taking the course. Anything you'd like to share (and it is anonymous) is highly valued, and I thank you in advance if you write something below.

[free text-box for the participants to write in]
